Ref No :	Order No: 212017763
Patient Name: Mr. Zeng [REDACTED]	Booking: Jul 21, 2020
Age Gender: 32 Y Male	Passport: T0 [REDACTED] 2
Order From: Flight# CA946	

Microbiology | Real Time PCR for Corona Virus

Sample

Nasopharyngeal Swab

Result

Negative

Booking: Jul 21, 12:56 **Result Processed:** Jul 21, 18:36

Interpretation

- A single negative test result, particularly if this is from an upper respiratory tract does not exclude the infection.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat Sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimen may be considered after a gap of 2-4 days after the collection of the first specimen for additional testing if required.

Method:

Test done by biosphore Noval Coronavirus (2019-nCoV) Detection Kit on ABI 7500 Realtime PCR system.

Note:

The result related only to the specimen tested and should be correlate with clinical findings.

**The test report shall cover follow information:
Name, Passport number and Flight number.
Otherwise, the Health Declaration Form will not
be granted.**

This is Computer generated report therefore signature is not required.
